Product Description
SlabArmor™ Plus Equipment Wash is a single component, concentrated, neutral pH reactive concrete remover. This product is an easy to use, simply spray on the concrete buildup and allow the product to work. SlabArmor™ Equipment Wash has a unique patent pending technology that has no adverse effect Machine surfaces or systems.

Built up material is cleaned by breaking the bond with the surface and is easily removed once it is no longer attached to the equipment. Material will continue to break free for an extended period of time. Cleaning with this product should be done once a week and continued use will prevent future build up. Surfaces are often cleaned down to the original material without damage so it’s no longer necessary to scrape or apply acids to your valuable equipment. SlabArmor™ Plus Equipment Wash is safe and easy to use.

PRIMARY APPLICATIONS
• Troweling Machines
• Concrete and Mortar Mixers
• Concrete Forms
• Hand Tools
• Precast Equipment
• Cutting and Grinding Equipment
• Screeds

FEATURES & BENEFITS
• Neutral pH
• No Rinse Formula
• No additional labor
• Concentrated
• Cost Effective
• Environmentally Responsible

Storage Instructions
Do not break seal until product is ready for use. Maintain unused product in the original container. Do not allow product to freeze. Store in a well-ventilated, cool, dry location and maintain temperatures between 40° – 100°F (4°– 38°C). This product has a shelf life of 18 months in its original unopened container.

Application
Maintenance......................1gal (3.78 L) wash/1 gal (3.78 L) water for sprayer
Restorative..................... 5 gal (18.9 L)wash/25 gal (95 L) water for drum

Technical Information
Typical Physical Properties at 73°F (22.7°C)
Dilute.................................. 1/1 (Product to water)
Odor/Color ......................... Green apple/Green dye
Solids by Volume .................. 17%
VOC Content....................... < 0.11 lbs/gal or < 50 g/L
Level ............................... 7-8.5

Maintenance Cleaning Instructions

Surface Preparation: All surfaces should be saturated with water prior to cleaning.

1. Mix Slab Armor™ Equipment Wash with equal parts water.
2. Apply to damp surface to be cleaned with a Hudson sprayer.
3. Spray surface to refusal. Saturate all surfaces to be cleaned.
4. Allow product to soak and penetrate the built-up concrete for 30-90 minutes and then scrub with a brush and pressure wash the equipment as usual.
5. Repeat as needed.

Clean-Up and Disposal

Clean sprayers and equipment with warm, soapy water following use. Any product that cannot be saved for recovery or recycling should be disposed of according to local, state and federal regulations. All containers should be disposed of according to local, state and federal regulations.

Precautions / Limitations

- Incompatible with strong oxidizers and strong acids
- Do not allow the product to freeze.
  - Store between 40° - 100°F (4°- 38°C)
- Do not blend with other products.
- Consult SDS before use.
