

MQ POWER **POWER BALANCE™**

Tier 4 reliability. Only from Multiquip.

Tier 4 engine emission systems cause problems under low loads. Excess soot build up can result in poor performance and untimely shutdowns. Given the variable load applications common to the rental business, how can you manage load to ensure clean, consistent operation? MQ Power generators with PowerBalance technology feature a fully automated, patent pending system that continually manages load levels to ensure proper performance, even in low load situations. MQ Power Tier 4 generators with PowerBalance protect your investment and give you the peace of mind you need in any environment, at any load level or for any application. Choose MQ Power Tier 4 generators with PowerBalance.
