Whiteman Power Buggies

The Whiteman Power Buggy is the preferred choice of contractors due to its dependability and versatility.

In addition to concrete spreading and spot pouring, the versatile 16-cubic-foot units are designed for landscaping applications, material sub-base distribution, job site cleanup and material transport.

Features:

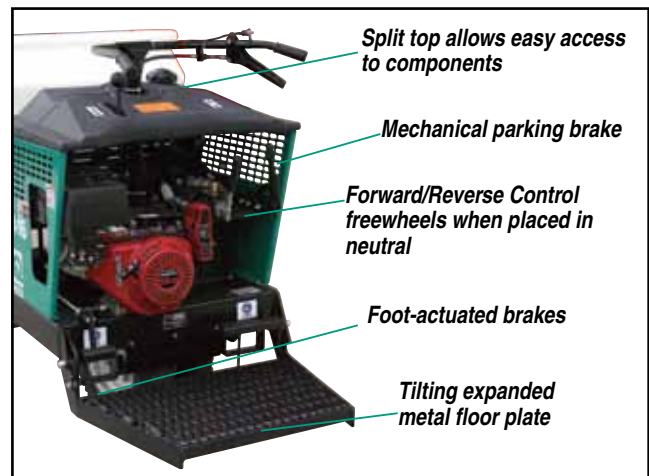

- **Heavy-duty frame** with low center of gravity for increased stability and traction
- **Large 5.5-gallon fuel tank** for extended, uninterrupted use
- **6" dump height** — the most clearance in its class; allows the operator to maneuver over forms
- **8% to 10% greater dumping reach** than most other buggies on the market
- **5% greater dumping angle** than the competition; eliminates the need to manually remove material
- **Splash protection** — a unique tub design reduces concrete outside splatter
- **Infinitely variable, fully hydrostatic drive system** allows smooth, steady operation
- **Multiple lifting points** — Simplifies placement on site
- **Hydraulic dump** activates by a hand lever or foot pedal
- **Removable tires** provide easy access to narrow work areas

Optional

Foam-filled tires — offer additional traction and puncture resistance

Specifications

	RECOIL START	ELECTRIC AND RECOIL START
Model (with Standard Tires)	WBH-16	WBH-16E
Model (with Foam-Filled Tires)	WBH-16F	WBH-16EF
Wheelbase in.	44	
Length in.	103	
Single-Wheel width in.	30.75	
Height in.	51
