Hydrostatic Ride-On Trowels

The industry leading hydraulic ride-on power trowels.

The Whiteman series of hydraulic ride-on power trowels delivers all the features that contractors demand from high performance finishing equipment. State-of-the-art hydraulics eliminates gearboxes, clutches and belts to create the most reliable and trouble-free design ever. These remarkable machines will help improve your F-numbers and change the way you think about ride-on trowels.

Ergonomically designed seat provides excellent support to help reduce operator fatigue.

Electro-hydraulic TwinPitch control enables the operator to simultaneously control blade pitch of both rotors with a simple rocker switch.

Tubular steel tank design improves flow and cooling of hydraulic fluid.

Proportional hydraulic steering helps the operator move the machine effortlessly across the slab.

Frame design provides operator with excellent visibility of the finishing surface.

Removable and flip-up panels provide easy access to components for maintenance.

Integral steps are provided for convenience.

Turbocharged engine provides optimum performance while reducing the maintenance expenses of dual-engine designs.

Six lights are standard for illuminating night time and indoor work areas

Standard "Enduro" trowel blades last up to 50% longer than conventional blades.

Operator's platform includes a built-in storage box for hand tools and accessories.

(STX shown. Called-out features are typical of all hydrostatic trowels.)

THE STX SERIES

With a span of ten feet, it provides maximum coverage while enabling you to produce floors with consistently superior levels of flatness. Twin six-blade rotors are driven by a powerful 60-HP* Yanmar turbo diesel engine chosen for its ability to withstand the tough concrete finishing environment.

Six-Blade Spider

- **Exclusively** on ten-foot STX Hydrostatic Trowels.
- **Achieve 33% more blade contact** for the fastest, flattest finish possible.
- **Obtain superior maneuverability and control.**
- **Reduce wear on pans and blades** due to outstanding balance and weight distribution.

THE HTX SERIES This high performance eight foot class machine is powered by a 44-HP Yanmar turbo diesel engine. With a top rotor speed of 140 RPM this trowel sets the standard for both ease of use and performance.

Additional HTX and STX Series Features

- **Hydrostatic drive** supplies optimum power to each rotor assembly for reliable performance. It reduces service costs by eliminating maintenance items such as belts, clutches and gearboxes.
- **Non-overlapping rotors** are powered by independent drive motors that consistently deliver the high torque required for pan applications and the high speed for final finishing.
- **Retardant spray system** is actuated by controls located on the steering handles for uniform coverage of the slab surface.
- **Adjustable seat** features armrests and provides essential back support. All controls and warning lights are convenient to the operator.
- **Automatic shut-down** beneath the seat stops the rotors from turning if the operator stands up while the engine is running.
- **Proportional hydraulic steering** has been enhanced and offers improved responsiveness with minimal effort on the part of the operator.
- **TwinPitch control is standard** for fast, accurate blade pitch adjustments.

Raised operator's platform includes lockable storage compartment

Spider assemblies feature long-lasting wear plates and spider hubs

Removable panels make servicing easy by allowing quick access to filters and trowel blades

Removable steps provide quick access to trowel blades

Rotor Speed Control allows the operator to set the rotor speed and reduces the amount of foot pedal travel to relieve fatigue during low speed panning

Mechanical Ride-On Trowels

MultiQuip sets new standards for performance, serviceability, and sustainability from a gearbox driven machine.

The HHX raises the bar with features that deliver utility and convenience you won't find on any other trowel.

THE NEW LOOK OF GREEN

- **Patented swing-away upper frame design** for simplified maintenance.
- **Helical gearboxes** offering the industry's most efficient, trouble-free design.
- **Continuously Variable Transmission** for optimum performance during pan floating or final finishing.
- **Six 55 watt Hella halogen lights** provide class leading illumination for nighttime and indoor work.
- **Proportional hydraulic steering** offers improved responsiveness with minimal effort on the part of the operator.
- **Twin Pitch Control** for fast, easy adjustment of blades.

THE HHX SERIES

Swing-away upper frame design makes service and maintenance easy.

Five-Blade Spider

- Exclusively on eight-foot HTH, HHN, HTN-31V and HTO-31V models.
- Achieve 25% more blade contact for faster, flatter finishing.
- Gain improved handling and control.
- Reduce wear on pan and blades due to better balance and weight distribution.

Make sure your equipment is capable of delivering the high-quality results you demand day in and day out. Multiquip mechanical ride-on trowels are the most powerful and dependable machines in the industry.

Operator is able to completely view the finishing surface through the frame.

Retardant spray system is actuated by controls located on the steering handles for uniform coverage of the slab surface.

Rugged frame is made of chromemoly steel to withstand the rigors of handling and transportation.

High-performance engines withstand the rigors of concrete finishing.

Weather resistant polyethylene fuel tank and battery box eliminates corrosion.

Mechanical TwinPitch control for fast, accurate adjustment of trowel blades.

Halogen lights provide illumination for nighttime or indoor work.

Lifting points are built into the machine for balanced lifting.

Servicing is made easy by a frame design that allows quick access to fill ports and filters.

Spider assemblies can be economically rebuilt and feature long-lasting wear plates and spider hubs.

(HHN shown. Called-out features typical of all mechanical trowels.)

*Two-year warranty covers parts and labor on ride-on trowel gearboxes.
One-year warranty covers parts and labor on the entire machine.*

THE HHN SERIES

is equipped with the coolest running gearbox in the industry. Power is supplied by either a 34-HP diesel or 31-HP* gasoline engine that spins twin five-blade rotors to a top speed of 160 RPM.

Patented TwinPitch control, available on all models, enables the operator to simultaneously control the pitch of both rotors with minimal effort.

Continuously variable transmission (CVT) provides superior performance by adjusting the drive ratio to obtain optimum torque and speed levels during pan floating and high-speed finishing.

Patented steering assist prevents operator fatigue and makes controlling the machine remarkably easy—even with float pans. Available on all models except JTO-Series.

Automotive style CV-joints ensure the consistent transfer of power to each gearbox. Spare belt carrier, conveniently located on the shaft, provides backup v-belts in the event one should break on the job.

Mechanical Ride-On Trowels

The ideal trowels for contractors who need hard-working, long-lasting, user-friendly machines.

Proven heavy-duty worm-drive design features large oil capacities and integral cooling fans to reduce heat build-up and are standard equipment on HTN and JWN-Series machines.

THE HTN SERIES

The entry level eight foot mechanical. Models are available with Kohler carbureted or fuel injected gasoline engines, along with all the features you expect to find on a Whiteman ride-on trowel.

THE JWN SERIES

These versatile six-foot machines are ideal for jobs up to 6,000 sq. ft. Their lightweight design is ideal for high-rises and enable contractors to get on the slab faster. The JWN is equipped with heavy-duty gearboxes and a continuously variable transmission that delivers a lightning fast rotor speed of 180 RPM.

Blades, Pans and Accessories

Perfection lies in the details...

That's why Multiquip takes such care in designing the accessories for its distinctive line of power trowels. Stay with the leader by using Genuine Multiquip pans and trowel blades.

MQ/Whiteman blades are made of heat-treated trowel steel, formulated to our specifications for maximum wear resistance and long life. Our blades are manufactured with additional rivets for greater uniformity and torsional strength. This increases machine stability and produces a smoother, flatter finish.

Enduro Blades use heavier gauge steel to achieve up to 50% longer life than conventional trowel blades. They are ideal for heavier walk-behind trowels and ride-on trowels. Quick Change Blades offer a simple, fast alternative to bolt-on blades. A re-useable mounting bar and channel mount blade system allows replacement of blades in minutes without the use of tools.

Some brands of trowel blades on the market today may resemble the MQ/Whiteman blade, but none comes close in quality, attention to detail and overall value.

Multiquip offers float pans designed specifically for all your panning needs.

- Allow operators to get on the slab later.
- Achieve higher F_f numbers and increased production.
- Removes the high spots and fills in low areas on the slab surface.

Trowel Arm Fixture

- Quickly check the alignment of each trowel arm with this simple tool.

Transport Dollies

EMR3 transport dolly for ease of maneuverability around the shop or jobsite.

EMR2Transport dolly (shown with JWN) for moving mechanical trowels around the workplace or on the jobsite.
