PH NEUTRAL DRUM WASH

SlabArmor™ Plus Drum Wash is unlike anything that's come before. Its patent pending proprietary chemistry is the first pH neutral product that effectively removes the built-up concrete in a mixer drum in an environmentally responsible manner. This is NOT like other acidic products used for removing concrete, SlabArmor™ Plus Drum Wash has no adverse effect on future loads. This product is a simple spray on, leave on, no rinse formula that allows you to spray on after the truck has been rinsed, before its parked overnight. Over a period of a couple of weeks you will notice that the amount of buildup in the drum has been reduced and new buildup is not being deposited.

Reduce your operating costs while reducing your maintenance overhead. Traditional means and methods of cleaning drums have peaks and valleys in reference to the cleanliness of the truck. SlabArmor™ Plus Drum Wash allows for even, consistent maintenance without the peaks and valleys. Don't continue to haul concrete that has setup in your truck.

MAINTAIN YOUR DRUMS

Attain greater levels of ROI and increase overall operating efficiencies by hauling only what you get paid for. Achieve results that last while reducing maintenance expenses and upkeep requirements over the life of your Equipment.
