

CHEMICAL SPRAYING SYSTEM

Transform your process while cutting costs.

WSC55 Chemical Spraying System

Multiquip's new WSC55 Chemical Spraying System offers significant time and cost savings. A small on-board compressor allows the operator to clear and reuse the leftover product that would normally be discarded, greatly reducing maintenance and waste.

- 1 **Powerful 5.5 HP Honda GX160 engine with gear reduction** provides reliable operation.
- 2 **Quick disconnect hose connections** for simple operation.
- 3 **Sloped chemical platform** allows all liquid to be easily dispensed from any container. Holds one large barrel or up to four small containers.
- 4 **Tow handle** allows unit to be moved on the jobsite by hand or forklift.
- 5 **Parking brake** to secure unit on unstable or uneven ground.
- 6 **Engine-driven compressor** for recycling any leftover product remaining in the system back into the original container.
- 7 **Convenient work tray** holds tools and other on site needs.
- 8 **Gripped control handles** for operator comfort.
- 9 **Smooth tires have no tread** to reduce the risk of floor damage.
- 10 **Single front tire** for easy steering and control.
- 11 **Hose rack** accommodates up to 250 feet of hose. Sprayers come complete with a wand and a 50 foot hose standard. Additional hoses available. (SH100 Hose 100 3/8 Assy, SH150 Hose 150 3/8 Assy, SH200 Hose 200 3/8 Assy)
- 12 **Also available: Barrel-mount attachment (WSC55BM)** offers the versatility of moving from a rolling cart to a stationary barrel for easy application.
- 13 **Built in** fork lifts.
