

SMART

COMPAS™ Compaction Analyzing System tells you when you're done.

Choose the reversible plate compactor with brawn AND brains.

A plate compactor that tells you when to stop. That's just what you get with the Multiquip® Reversible Plate Compactor with Compas™ Technology. As soil stiffness changes, the LED display lights up and lets you know the job is done. No more over compacting and no more costly rework. Now that's smart!
